Re: In the Matter of Tennessee Valley Authority, Docket No. CAA-2000-04-0008
Order Under Sections 113 and 167 of the Clean Air Act

Dear Mr. Bynam:

Enclosed is an Order issued pursuant to Sections 113(a) and 167 of the Clean Air Act (CAA), 42 U.S.C. §§7413(a) and 7477. The United States Environmental Protection Agency (EPA) finds the Tennessee Valley Authority (TVA) is in violation of the New Source Review (NSR) requirements of the CAA, including Prevention of Significant Deterioration (PSD) attainment area requirements and New Source Performance Standards (NSPS). TVA failed to obtain NSR permits authorizing the construction and operation of physical modifications of coal-fired electrical generating units at TVA's coal-fired power plants at the Paradise Steam Plant in Drakesboro, Kentucky; the Colbert Steam Plant in Tuscumbia, Alabama; the Widows Creek Steam Plant in Stevenson, Alabama; the Allen Fossil Plant in Memphis, Tennessee; the Cumberland Fossil Plant in Cumberland City, Tennessee; the John Sevier Fossil Plant in Rogersville, Tennessee, and the Bull Run Plant in Clinton, Tennessee.

All of the requirements of the Order should be carefully read and analyzed. TVA must comply with the remedial measures described in the Order within the dates specified in the Order. If you have any questions regarding the Order, you may contact Angelia Souder Blackwell, Environmental Accountability Division, EPA Region 4 at (404) 562-9527 or Dan Drazan, Federal Facilities Enforcement Office, EPA Headquarters at (202) 564-2328.

Sincerely,

John H. Hankinson, Jr.
Regional Administrator
